CREATE A MORE COLORFUL IMAGE

Today, color is not an option – it's a tool that smart businesses use to gain a competitive edge. With the new Gestetner C7004 Color Laser Printer, you'll produce dynamic presentations, download vibrant images from the Internet or your digital camera and breathe new life into all of your business communications.

PREMIUM COLOR OUTPUT YOU CAN AFFORD

The Gestetner C7004 makes full color laser printing practical for everyone. And, with 600 dpi resolution and print speeds of 4 PPM for full color printing and 16 PPM for black and white printing, it's the ideal solution for any small office or workgroup. You'll create images that will command attention, your presentations will be refined and your proposals will be winners.

Plus, the C7004 offers a significant advantage over slower color inkjet printers. Its monocomponent imaging system simplifies routine user maintenance while providing an economical cost per print.

ADD COLOR TO EVERYDAY COMMUNICATIONS

The C7004 offers PC and MAC compatibility, ensuring support for virtually all of today's most popular business and graphics software. Add the optional Fast Ethernet LAN connection and your entire office or workgroup will become more creative. The C7004 prints onto a variety of media and offers up to 8 1/2" x 14" full color output. A 250 sheet Paper Tray is standard and an additional 250 sheet paper tray is also available. The C7004 can also image onto 90 lb index stock – allowing you to add professional covers to any document.

Proprietary Gestetner Net Vision software facilitates on-site or remote management of all Gestetner connected products on your network. A convenient icon located on the Windows Task Bar allows clients to view system status, troubleshoot problems and check on supplies – with just a single glance.

WHEN IT'S TIME FOR A NEW IMAGE

It's time for Gestetner – whether it's brilliant color, productive network printing or intelligent multifunctional systems – our complete line of network output systems will provide solutions for all of your network imaging requirements.
