Wide Format Copiers

***Powerful, Affordable Solutions
Bring Large-Document Production In-House***

*Full size copies, convenient
and affordable*

LW110/LW111

Wide Format Copiers

Time was, if you wanted full-size copies of large documents - drawings, posters, plots, plans, and the like - you had to either go over to the local blueprinter, who had the specialized equipment for creating those copies, or you had to bring the ammonia fumes of your own blueprint machine in-house. In some cases, it was even possible to get by with an older, not-very-reliable office copier whose results were sometimes of questionable quality. The work got done, but outsourcing was costly, and efficiency and control were big issues. And using an in-house blueprint unit was time-consuming and gave everyone headaches. For small companies with low-to-medium copy volume, it was a dilemma.

Fortunately for customers needing those larger copies, Lanier offers the perfect solution. With the affordable, easy-to-use Lanier LW110 and LW111 wide-format

copiers, even relatively small companies - architects, builders, designers and ad agencies can have their own in-house wide-format copying capability, along with the flexibility, control and responsiveness

to customers that go with it. Lanier's wide format products have earned a reputation for durability and reliability along with the ability to produce excellent image quality. The new LW110 and LW111 fulfill that promise and deliver even more.

Depending on your business needs, choose the LW110 single-copy version or the versatile LW111, which can produce multiple copies from a single original. Both turn out four high-quality copies per minute, accept a wide range of original sizes, from 8.5" x 11" to 36" x 48", and can save your business money right from the start.

Ease of Use: The Lanier Advantage

With Lanier's easy-access design, logical, readable display control panel, and intuitive operating instructions, you'll never need extensive training or specialized employees to run these machines. Note also how slim and compact the Lanier wide format copiers are. Unlike many of their competitors, the LW110 and LW111 take up minimal space in the office, an important benefit for organizations in limited size workspaces. Start with Lanier's successful **clamshell**

design, an important convenience feature that lets you do everything - feeding of originals, clearing misfeeds, changing toner cartridge and replacing paper rolls - at the front of the unit. No more struggling with oversized rolls of paper. Lanier's simple **flange inserts** simplify **paper changing** once and for all. Simply slide the inserts into the end of the replacement roll and lay it in the paper compartment. The copier does the rest. Changing the toner cartridge, also at the front of the machine, is just as simple.

Look at the simplicity and the intuitive layout of buttons and controls on the **display panel**. Controls are right where you would expect them to be, and instructions are clear and to the point. Operation is so simple anyone in your organization can learn in a few minutes.

Professional Quality with the Push of a Button

Wide format copies are clear and sharp, even from worn or damaged originals. The Lanier LW110 and LW111 offer the latest in Lanier technology - **14-step density control** to guarantee top image quality and sharp, fine reproduction with no background muddiness. Whether you supply paper from the standard sheet feed or the optional roll feeder, Lanier technology makes sure your copies are the exact size of the original. On the LW110, **Semi-Synchro Cut** reduces the need to measure the length of every original. While using the roll-feed option, just select one of the five predetermined settings or press a button as the original feeds. Your copy's length will match the original. Ensuring accurate copy size is even easier with the LW111. Just activate **Synchro Cut** and the LW111 automatically makes a perfect size match between original and copy.

Affordable Price, Money-Saving Operation

Lanier's wide format copiers are competitively priced and will save your company money on several fronts. You won't have to pay those high per-copy costs to outside vendors, and you'll be able to control scheduling and customer service costs as well. The LW110 and LW111 help you keep an eye on copy media costs as well. For instance, let's say you're copying from a damaged or poor quality original. Why print the whole full-sized copy only to find that the copy quality based on the original is unacceptable? With Lanier's **Partial Copy** capability, you can copy a small section of the original, then decide whether you want to continue.

Environmentally Responsible, People-Friendly

While the LW110 and LW111 are tackling those large-copy jobs, they're going easy on the environment. Designed with lower ozone emissions and reduced operating noise, the LW110 and LW111 meet the guidelines of the EPA's Energy Star program. It's part of Lanier's commitment to the worldwide environment and to making our customers' workplaces more pleasant for their employees.

LW110/LW111

Wide Format Copiers

Specifications:

Configuration:	Desktop (LW110) Console (with Roll/Feeder/Table Option)
Copy Process:	Dry Electrostatic Transfer
Warm-up Time:	Less than 3 minutes
First Copy Time:	Less than 21 seconds (LW110) Less than 25 seconds (LW111)
Multi Copying:	30 seconds (LW111 only)
Copy Speed:	4 cpm ("D" copies)
Original Size: Maximum (Max. for Multi-Copy) Minimum Thickness Rear Feeder	36" Wide (E), Max. Length: 9'8" 49" Long (LW111 only) 8.3" x 11.7" 3mm (LW110) 3mm (LW110), 1mm (LW111)
Copy Weight: Maximum (Max. for Multi-Copy) Minimum Copy Material Feed Copy Media	36" Wide (E), Max. Length: 9'8" 49" Long (LW111 only) 8.3" x 11.7" 1 or 2 Roll Feed, Manual Feed Bypass Plain Paper, 14 to 36 lb.
Multiple Copies:	Up to 10 (E) (LW111 only)
Reproduction Ratio:	1:1 (±0.5%)
Input and Output Devices: Manual Bypass Copy Exit	1 Sheet Upper (LW110), Lower (LW111)
Paper Cutting Method:	Semi-automatic Synchronized Cutting (LW110) Automatic Synchronized Cutting (LW111)
Power Source:	120V, 60Hz, 15A
Power Consumption:	Max. 1.4Kw, Warm - Up: 1.2Kw
Dimensions: Copier Only Table	LW110: 42.5" x 26.4" x 51.6" LW111: 47.2" x 31.6" x 44.9" 42.5" x 25" x 24"
Weight (Copier Only):	LW110: 167.6 lbs. LW111: 174.2 lbs.

Special Features:

Auto Clear
Auto Off
Auto Start (LW111 Only)
Clear Modes
Emergency Stop Key
Energy Saver Mode
Fusing Temperature Adjustment (15 steps)
Job Program
Manual Image Density Adjustment (14 steps)
Margin Adjustment (4" lead/rail)
Partial Copy

Options:

1 or 2 Roll Feeder Table (Combined Table and Roll Feed)
Roll Cutting Rail (LW110)
Multiple Copy Stacker (LW111)
Table (LW110)
